

ADITI SINGH

Mobile Number: +918353975946, Address: Varanasi, Uttar Pradesh, India

Email : aditi.1809personal@gmail.com , [LinkedIn](#) , [GitHub](#), [LeetCode](#)

SKILLS

Programming Languages:	Python, JavaScript, C, C++, Java
Web & Backend:	HTML, CSS, Node.js
AI/ML Tools:	Pandas, NumPy, Scikit-learn, OpenCV, MediaPipe, Computer Vision, CVZone, TensorFlow
Generative AI:	LLMs, LangChain, RAG, Prompt Engineering, Vector Databases
Databases & Tools:	MySQL
Core CS Concepts:	Data Structures and Algorithm, OOPs, OS, DBMS, Deep Learning
Soft Skills:	Communication, Teamwork, Problem Solving, Time Management

GenAI Skill Badges Earned: [Badges](#)

EDUCATION

Bachelor of Technology in Computer Science Engineering, Shri Mata Vaishno Devi University 2027
Jammu & Kashmir, India
CGPA: 9.41 **SGPA:** 9.22

WORK EXPERIENCE

Machine Learning Intern (*Unified Mentor*) 2025
Worked on data analysis and machine learning projects involving data preprocessing, visualization, and model building.
GitHub: [Projects Link](#)

PROJECTS

- **Sign language detection and sentence forming using Computer Vision:** Developed a computer vision-based system that detects hand gestures in real-time and converts them into corresponding text, forming meaningful sentences. The project helps bridge communication gaps for hearing and speech-impaired individuals using image processing and machine learning.
GitHub: [Project Link](#)
- **Attendance System using Computer Vision:** Designed an automated attendance system that uses face detection and recognition to mark attendance in real time. The system reduces manual effort and ensures accuracy by identifying individuals through live camera input.

CERTIFICATIONS

GenAI exchange Program (Google): Things Learned: Foundations of Generative AI, Large Language Models (LLMs), Prompt Engineering, Generative AI tools & Platforms (Google Vertex AI, Google AI Studio), Working with APIs, Building and deploying models. [Certificate](#)

Machine Learning Course (Analytics Vidhya): Things Learned: Basic Machine Learning Algorithms along with data cleaning, feature extraction, normalization techniques etc. with projects. [Certificate](#)
